

QuikArt™ Mosaic Adhesive Film

Quickly and easily create beautiful heirloom quality PhotoMosaic works of art using your own photography, postcards, collages, fonts and more!

Required Materials:

QuikArt™ PhotoMosaic Plaque
 2 Pieces of QuikArt™ Mosaic Adhesive Film
 Heat Gun, Embossing Gun or Oven
 Photograph, Postcard, Print or Collage
with film you can use images printed on ink jet printers
 Clear Photo Nibbles & Bits™ Glass Tiles
 Sanded Grout (available in a variety of colors)

Optional Useful Tools:

Wheeled Tile Nippers (73101 or 70200)
 Latex or Rubber Gloves

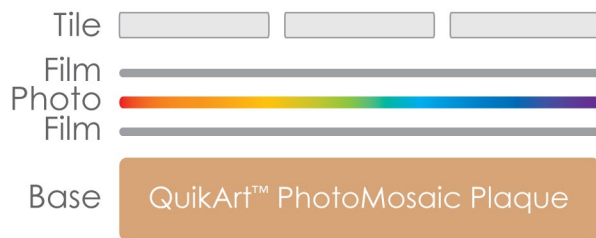

Creating your own PhotoMosaic work of art is a piece of cake. Simply layer the "ingredients" as illustrated below. Then, using your heat gun, start heating your creation from about 12" above using a circular motion until both pieces of film have completely melted and "fused" your work together. Alternatively, place your creation in an oven (on foil) at 250°F for 10 minutes.

We suggest using approx. 1/8" spacing between tiles. Be mindful not to create grout lines where eyes or other important photographic elements may be. After you have heated your piece and it has cooled, it is immediately ready to grout!

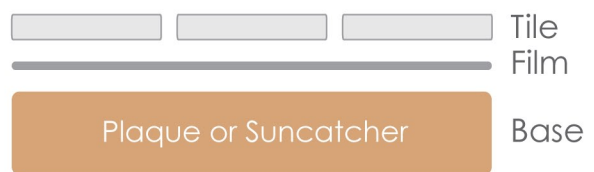

If bubbles occur, simply use a tool to press down on the tile while heating to minimize bubbles.

PhotoMosaics

Without Photo

QuikArt™ Mosaic Adhesive Film is also available in easy to cut bulk rolls that allow you to use it on any shape.

Check out our website for demo videos, ideas, inspiration and additional products.

QuikArt™ PhotoMosaic Plaques are USA made from 99% recycled material. Nibbles & Bits™ are hand cut in the USA and made from USA made glass. Film is manufactured in the USA by Streuter Technologies, Inc.
